

HTML Links

1. Save the red asterisk clipart shown below to your Web Design folder.

2. Create a new HTML document using NotePad and enter the basic set of starting tags. Save the document to your webpagedesign folder.
3. Add the following information to the body tag.
 - o Set the background color to an off-white.
 - o Set the default text color to red.
 - o Set the color of links to purple.
 - o Set the color of active links to blue.
 - o Set the color of visited links to green.
4. Recreate the page as it appears in the screenshot shown below making modifications so that the page really does reflect your favorite links.
 - o Set the face for the font to arial.
 - o Center the title using heading size 1.
 - o Set the font size to 4.
 - o List at least 10 links to other web sites. (The list needs to be more than one screenful.)
 - o Make sure that there are no borders around the asterisks.
 - o Make sure that the link for the asterisk and the link for the text are separate from each other.
 - o Leave a blank line between each item in the list.
5. Add two more links at the bottom of the list. (NOTE: These links are not displayed in the screenshot.)
 - o Link to a document that you have created for another lab. Label it "My Favorite Lab."
 - o Link to your email address. Label it "Please Send Me Comments About This Page."
6. Create another new HTML document and save it to your webpagedesign folder. Display a friendly greeting on the page. The page title "My Favorite Links"
