Advanced Table Features

Directions

Use your notes and the WWW Consortium Web site tutorials to help you recreate the tables you see in the following activities.

The address for the tutorials is www.w3schools.com/html/html_tables.asp.

Although your tables may be slightly different than the examples, they should be very close.

Descriptions

Activity 1

Horizontally centered, bordered, table with grey shading in the data cells.

Activity 2

A bordered table with salmon and gold shading in the "Color" data cells. The cells should have added height to add space around the text and all contents should be centered horizontally and vertically. The items in the column "RGB value" are bolded.

Activity 3

Uses ROWSPAN to create the larger cell and has the colors listed in each cell. Add additional spacing to get the text off the edge of the border.

Activity 4

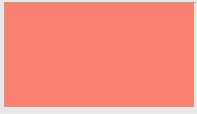

Uses COLSPAN to create the larger cell and uses CELLSPACING and CELLPADDING to make a larger border and add space for the text from the border edge.

Use WordPad or Note Pad and save each as the Activity name.
